Spring Cleaning Checklist

WHAT YOU'LL NEED

- ○ A Sturdy Ladder
- ○ Rubber Garden Gloves
- ○ A Gutter Cleaning Scoop or Tool
- ○ A Trowel
- ○ A Debris Removal Bag or
- ○ Compost Bin
- ○ A Garden Hose

BEFORE YOU PROCEED

Remember, **97% of ladder injuries happen at home**, outside of a work environment. If you are not comfortable climbing a ladder and using both hands to remove debris, it is not safe for you to clean your own gutters.

STEP ONE: CLEAN

Using the gutter scoop, remove the leaves and debris from your gutters beginning at the downspout (where the water heads down to the ground) and working backwards towards the closed end. Use your trowel to scrape anything stuck on, and put debris in the debris removal bag to keep your landscaping clean and tidy.

STEP TWO: INSPECT

Using this checklist, indicate what you see visually in each area of the gutter, below the gutters, and in the downspouts. Run the garden hose through the gutter sections briefly and watch how the water drains, if it pools and if there's any damage.

STEP THREE: CONTACT A PROFESSIONAL IF NEEDED

If you find damage or find you cannot successfully clean all areas of your gutter, reach out to the professionals at Aerotech for a FREE estimate and gutter cleaning, repair, and installation.
